Fluor Ranks NUMBER ONE Among *Fortune* Magazine's Most Admired Companies

CINCINNATI, Ohio, March 10, 1998 - *Fortune* magazine has identified Fluor Corp. as "the world's most admired public company in the engineering and construction industry" in its March 2 issue. This is the fifth consecutive year that Fluor has earned this top honor.

Peter Fluor, Fluor Corporation Chairman said, "We are very proud to have been selected again as America's most admired engineering and construction company. Our employees work very hard to deliver value to Fluor's two most important constituencies -- our clients and stakeholders -- and this designation recognizes their efforts. Our company's strategic direction will further strengthen the eight key attributes which *Fortune* ranks, and we intend to create even greater value for our stakeholders in the future."

"I am proud of all the Fluor Daniel Fernald employees for adding to the success of Fluor Corp.," said John Bradburne, president of Fluor Daniel Fernald, a subsidiary of Fluor Corp. "Fluor Corp. is successful when the thousands of projects located throughout the world are successful -- including Fluor Daniel Fernald. Fluor Daniel Fernald has made tremendous progress in cleaning up the Fernald site and we will continue to work with the U.S. Department of Energy and members of the community to eliminate health risks and eventually close the site."

Fluor Ranks NUMBER ONE Among *Fortune* Magazine's Most Admired Companies

Judged by senior executives and outside directors in the industry, as well as by financial analysts, the criteria *Fortune* used to rank companies included:

- C Innovation
- C Overall quality of management
- C Value as a long-term investment
- C Responsibility to the community and the environment
- C Ability to attract and keep talented people
- C Quality of products or services
- C Financial soundness
- C Wise use of corporate assets.

Fluor Corp. is one of the world's largest engineering, construction, maintenance and diversified services companies. Fluor Daniel Fernald is a subsidiary of Fluor Corp., and is the primary contractor responsible for cleaning up the Fernald site.
